

PROFESSIONAL SUMMARY

8+ years of professional experience across game development, television, animation, advertising, and live stadium shows. For the past five years, I have specialized in game audio, creating immersive sound design, interactive music systems, and technical audio solutions using Wwise and Unreal Engine. Experienced across the full audio production pipeline, from concept and composition to implementation, optimization, voice integration, and final mix.

EXPERIENCE

- VCHAudio — Individual Entrepreneur

Sep 2017 — Oct 2021 · Remote, contracts, freelance

Operated an independent music studio, delivering end-to-end audio solutions for individual contract projects across TV, live shows, advertising, and the game industry.

AWARDS Winner — Winner International Motorfilm Awards, 2018 · Nominated — Nominated KISFF and Toyota, 2019

- Music Composing
 - Foley, Sound Design
 - Composing, arranging, and producing songs
 - Mixing and mastering own and contract projects, TV series, shows, games, etc.
- Argentics / Night Street Games

July 2025 — July 2026 · USA, remote

Last Flag

Senior Sound Designer, Technical Sound Designer, Lead Audio Designer

- Sound design & implementation for gameplay, characters, weapons, abilities, and UI (Unreal Engine, Wwise).
 - Built gameplay feedback systems: hit ticks, damage reactions, healing and ability cues.
 - Composed music and designed SFX for MVP screens for 11 heroes.
 - Voice-over editing and integration; custom foley recording (rollerblades, landings, character movement).
 - Contributed to dynamic mixing and HDR audio implementation.
- Moonray PBC

Nov 2021 — June 2025 · USA, remote

Moonray: Battle Lands

Audio Producer, Principal Sound Designer, Technical Sound Designer, Audio Developer, Music Composer

- Full-cycle sound design from scratch — custom foley, processed layers, and a sci-fi audio aesthetic.
 - Implementation in Wwise and Unreal Engine 5 (Blueprints, Niagara).
 - Designed and maintained complex Blueprint-based audio systems.
 - Composed original interactive combat tracks, menu theme, and musical emotes.
 - Interactive mixing; platform-specific optimization for PC, Android, and PlayStation 5.
- Broadcast TV channel

Sep 2020 — Sep 2021 · Odesa, on-site part-time

Directed live sound for broadcast TV, operating the mixing console and coordinating with production crew to ensure flawless audio

- Live mixing for broadcasts, hosts, TV programs, and music bands.
 - Microphone tuning, balancing, and technical support — full live-broadcast sound engineer duties and assistant work.
- NLO TV

Jan 2019 — May 2021 · Kyiv, remote part-time contract

Led audio production for the animated TV series Chortoviyki (2019–2021), creating sound design, foley, and final broadcast mixes. The series aired on NLO TV

- Sound design, foley, mixing and mastering for an animated cartoon series.
 - Created and integrated custom sound assets for episodes, keeping consistent tone and clarity.
 - VO editing and processing for characters and narration.
